VACCINE DISTRIBUTION WEBSITE COPY

In accordance with state and local guidance, **Ascension Michigan is scheduling appointments for administering the COVID-19 vaccine to our high-risk Ascension Medical Group patients who are age 65 and older. These vaccines will be provided at our regional community vaccination clinic sites across the state.**

We are proactively and personally contacting eligible patients by email, text and phone to schedule their appointment. Vaccinations must be scheduled in advance, and walk-ins will not be accepted. Persons without an appointment will not be eligible for vaccination at this time.

Ascension Michigan serves approximately 150,000 Ascension Medical Group patients who are age 65 and above. As vaccine supply remains limited, it will take several weeks to successfully schedule and administer vaccines to this patient population.

In addition to vaccinating our Ascension Medical Group eligible patients, we are **partnering with the county health departments** to assist with vaccinating area healthcare professionals and qualified essential workers per current state of Michigan guidelines.

In the meantime, the **Michigan Department of Health and Human Services, your local public health authority and/or the Centers for Disease Prevention and Control (CDC) website** can provide you the latest information regarding vaccine distribution.

We appreciate everyone's patience and understanding as we continue to support the State of Michigan in this statewide vaccination effort. As we await additional distribution of the COVID-19 vaccine, **please continue to wear a mask, watch your distance and wash your hands** to protect yourself and others.
